NPIC Project J-322/63

A facility on the west side of the Perm Munitions and Chemical Combine K. Kirov 98 has been identified as a probable static test facility for explosives or solid propellants. First seen in an early stage of construction in [REDACTED] 1/, the facility is now in a late stage of construction.

25X1D

This facility is composed of one firing bay and a bunker against which a horizontal blast is probably directed (Figure 1). It is almost

identical to other test facilities recently identified at Biysk, USSR 2/, and at Sterlitamak, USSR 3/; however, each of these two sites has an H-shaped support building which is lacking here.
